Registering and Requesting a visit on PMP Anywhere Website

1. Open a new browser and type in: https://www.pmpanywhere.com/

2. Click on “register your account”

3. Enter YOUR name and date of Birth. Since your child is a minor, you must first create an account for yourself as the guardian and then add your child to your account. Once you have an account, you may add any number of children even with different last names and different insurance benefits as long as you are their legal guardian.

4. Continue to move through the registration process, making sure to fill out and check off ALL boxes and add all your demographic information.

5. Once you have finished the registration process, you will be redirected to the home screen of your account. You can then add your children as your dependents by clicking “Add Dependent” on the top right of the screen.

6. At the Home screen click on “REQUEST A VISIT.” You will then be asked to choose which child and enter what state you are in. You will also need to update the child’s medical profile if you did not fill it out completely when adding the dependent. *Note: your child will not be able to see the doctor until the demographic info Medical Profile are complete.
